LABENCOR extends the scope of ENAC accreditation for its corrosion tests.

Aware of the importance for our clients to have a trusted partner, who offers a wide range of services accredited by ENAC, we are happy to announce that after a recent audit of **ENAC, LABENCOR** (Laboratorio de Ensayos de Corrosión, S.L.) has achieved the extension of the scope of accreditation, obtained according to the reference standard **UNE-EN ISO/IEC 17025:2017**, accreditation that guarantees the goodness of the data reported by the laboratory at international level.

Since 2015, **LABENCOR has carried out constant extensions of the accredited scope**, or what is the same, it has included new tests under the international standard and, for which it has accredited technical competence.

The achievement of this extension of the scope of accreditation represents the formal recognition of the work philosophy promoted in **LABENCOR**, providing added value in terms of reliability that directly affects the trust of customers, strengthening the image of the organization.

LABENCOR trusts that this qualitative leap in its offer of trials will please the market and help them to improve the quality of their processes and their competitiveness. We will continue to work on the improvement and updating of its services in order to maintain this **seal of quality**, currently positioning itself as one of the reference laboratories in corrosion tests at national level.

The new technical annex can be consulted on our website (http://www.labencor.com) or on that of the National Accreditation (https://www.enac.es).
